Saveetha Institute of Medical and Technical Sciences
Chennai- 602105

Student Name: G.Hima Bindu

Reg. No.: 192511377

Course Code: CSA1522

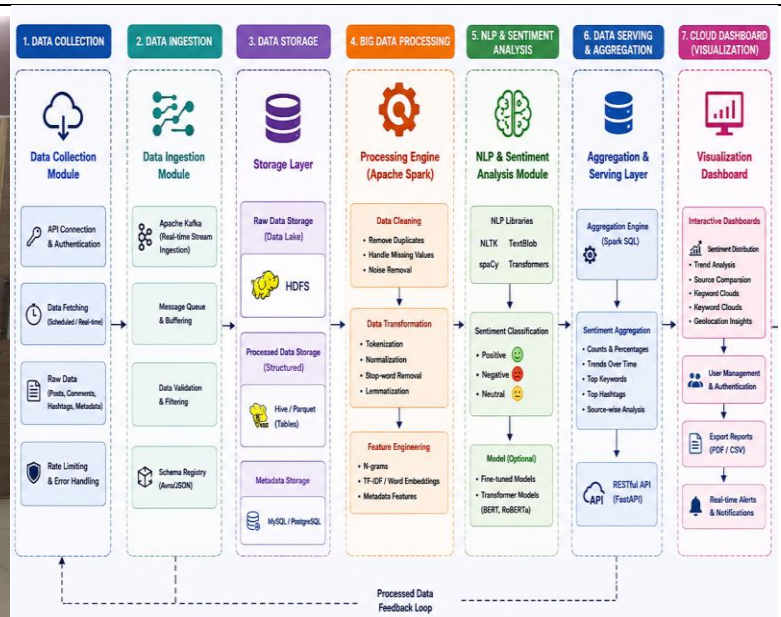

Slot: C

Course Name: Cloud Computing and Big Data Analytics

Course Faculty: Dr. P.Rajaram

Project Title: Big Data-Based Social Media Sentiment Analytics Platform

Module Photographs:

Project Description:

The **Cloud-Based Visualization Dashboard** is a web-based system designed to collect, manage, analyze, and visualize data using cloud computing technologies. The project provides an interactive dashboard where users can view important information through charts, graphs, tables, and other visual elements. Cloud storage and services are used to store and manage the data, making it accessible from different locations through an internet connection. The dashboard helps users understand large amounts of data quickly by converting raw data into meaningful visual information. Different visualization techniques such as bar charts, pie charts, line graphs, and summary cards are used to identify trends, comparisons, and patterns. The system also focuses on user-friendly design, easy access, data security, and efficient data management. Overall, the project demonstrates how cloud computing and data visualization can be combined to support better analysis, monitoring, and decision-making.
